SUMMARY

Curious Business Analyst with 5+ years of experience in **Banking, Supply Chain and E-commerce domains**, most recently as a Senior Business Analyst managing Automation – RPA projects for TD Bank. My expertise lies in developing data-driven solutions, streamlining processes, and delivering automation initiatives that enhance operational efficiency and drive business growth.

SKILLS

- **SQL** – Advanced queries, Data management queries, Creating & Modifying tables, Security, User roles, Permission, etc.
- **BI Tools** – **Tableau, Power BI**, Power Pivot, Python, Kurve, MS Excel, etc.
- **Advanced MS Excel** – **VBA** programming, Macros, Pivot tables, VLOOKUPS, MS Access, PowerPoint and Word.
- **Business software** – JIRA, Lucid chart, Visio, Miro, iWMS **IBM TRIRIGA**, SAP ERP, Confluence, Manhattan AS400, High Jump, etc.

WORK EXPERIENCE

Wolseley Canada Inc.

Toronto, ON

Business Analyst (Contract)

02/2024 – Present

- Collect **business requirements** and cases, design and propose solutions to optimize business needs on WMS.
- Perform requirements Analysis, design, and prototyping (ETL) for Management Dashboards, Financial reports, and Operations BI using **Power BI, DAX, Microsoft Access, Oracle Toad and High jump WMS**.
- Ensure the accuracy and availability of Data for Various Distribution centres across the GTA
- **In liaison with Operations, IT, and Supply Chain Teams to gather requirements, Design solutions**, and report findings and insights.
- Used SQL to write complex queries and pull data for analysis using Oracle Toad.
- Responsible for **ad-hoc Operations reporting**, and in charge of making Operations Scorecards for weekly presentations.

Tjene Consulting Corp.

Toronto, ON

Technical Business Analyst - Automation

01/2022 – 01/2024

Data Analysis & Reporting

- Developed and maintained interactive dashboards and reports using Tableau to provide actionable insights into key business metrics, including [Project budgeting, bid request approvals, and CTO People's reporting] using Tableau and Crystal reports
- Portfolio Management – **Capital Project and Facility Management** lines of business tickets, backlogs, and priority tickets in Jira.
- Conducted in-depth data analysis using SQL queries to extract, transform, and load (ETL) data from TRIRIGA Oracle SQL database.
- Performed ad-hoc data analysis to address business questions and support decision-making processes.
- Developed and implemented data quality checks and validation procedures to ensure data accuracy and integrity.
- Collaborated with Clients and stakeholders to understand their data needs and translate them into actionable insights.

Business Analysis & Reporting

- Participated in the Software Development Lifecycle (**SDLC**) (Agile and Waterfall), analyzing business requirements and process design using Miro and converting them into functional and technical solutions.
- Collaborated in Scrum, requirement gathering sessions, stakeholder workshops and documenting technical requirements.
- **Maintained documentation for both technical & functional solutions, configuration**, and shared knowledge in code review sessions.
- Updated and managed **Jira** for user stories, test statuses, and backlog, ensuring clear communication across cross-functional teams.

Process Improvement & Automation

- Designed, developed, and deployed an automation workflow for Vendor Invoice Submission, improving efficiency by 70% and cutting manual processes. [Tool used – **Tririga/Power platforms, JavaScript, SQL, XML, HTML, CSS**]
- Proficient in implementing low-code/no-code solutions with tools like IBM TRIRIGA, focusing on business object workflows and data mapping for process optimization.
- Created test scripts and use cases for **UAT testing** (QA) with coordination and updating in Jira with user stories, status, etc.

Pearl Technologies Ltd.,

Mississauga, ON

Data Analyst (Contract)

07/2021 – 12/2021

Data Analysis

- ETL (Extract, Transform, Load) to avoid data duplicity and exploratory data analysis. **Excel-VBA**
- Collecting data related to GPS, etc., cleaning and ensuring statistical efficiency, integrity, and quality for analysis, identifying patterns, detecting anomalies, and providing insights for continuous improvement.
- Identified patterns and anomalies and provided insights on operations data to remove irregularities to save on monthly Invoices. [Tools used – **MS Access, VBA Programming, Macros**].

Business Analysis:

- Part of the Software Data migration project where I was responsible for extracting and cleaning data for verification and Gap Analysis.
- Coordinate with stakeholders to understand the concerns, and analyze data for pricing, strategy, and decisions.
- **Audit Operations and Invoices in QuickBooks** - automated this process by MS Power Automate (saved 70% of the time) and validated and audited the tableau reports and dashboards over time to access the quality.
- Audit and analyze complex data and help it make sense using why-why analysis and root cause problem identification.

Umbra Ltd.,

Toronto, ON

Analyst (Contract)

08/2020 – 07/2021

International Logistics:

- Plan and negotiate with 3PL companies for booking of dry-van 53" trucks weekly and monthly concerning capacity objectives and again planning with DC concerning receiving schedules (US and Canada Cross border shipment)
- Manage container shipments from China to North America by coordinating with brokers and 3PL companies.
- Certify that logistics activities comply with US customs, Border protection regulations and CBSA.

Auditing & E-commerce planning:

- Coordinate with the Marketing and Category Management department to help them in Order management, B2B, B2C, EDI and plan promotional events and other activities from logistics and transportation.
- Reporting offline shipping reports monthly of different e-commerce accounts with insights on expenditure.
- Auditing E-commerce account invoices for Canada-post and FedEx accounts and saved 40,000 annually.

Reporting and other responsibilities:

- Reporting and updating expired HST numbers in SAP & FlexPLM.
- Create and update SOPs, act as SME to train new hires and coordinate with different departments.
